

Fly Bye™

Fruit Fly Lure

A pesticide-free lure for attracting and killing the male Queensland Fruit Fly (*Bactrocera tryoni*).

Fly Bye™ is based upon a breakthrough formulation of native oils which have proven to be spectacularly successful in attracting the male fly and thereby disrupting the breeding pattern of this major pest. Refillable plastic bottle traps are hung in the growing area at a rate of four per hectare.

Benefits

- Biological Farmers Australia (BFA) Registered Input – AI456.
- Fly Bye™ may be used as a monitoring tool in conjunction with routine spray programmes.
- The product may also be used to detect the on-set of the fruit fly season and to reduce the local fruit fly pressure.
- Integrate into fruit fly control programmes on properties committed to pesticide free farming techniques.
- Attracts and kills male flies when used as directed in a wet trap (not designed to be effective when applied to a cotton wick as no insecticide is present). Note: Flies will be attracted but not killed and are likely to escape from the trap.

APVMA Approval Number: 59531

PACKAGING

1 L, 5 L, 20 L, 1 L + Trap, Trap Only, 20 x Traps
Product Code: FLYBYE

Fly Bye™

Fruit Fly Lure

Application Rates

Pour attractant into base of trap supplied, to a minimum depth of 20 mm.

Place trap upwind in a shaded branch on the eastern side of the tree approximately 1.2 metres off the ground.

Place four traps per hectare equally spaced around areas where fruit flies are to be monitored/controlled.

Recharge traps when liquid attractant evaporates to a depth of 15mm.

When recharging the traps it is advisable to remove dead flies from the trap liquid by an effective means such as pouring the liquid through a sieve or using a small spoon.

Miscellaneous

Not to be used for any purpose or in any manner contrary to the label unless authorised under appropriate legislation.

Withholding period not required when used as directed.

Typical Analysis

ACTIVE CONSTITUENT:

Maximum 0.5 g per L 4 - (p-hydroxyphenyl)-2-butanone acetate and minimum 0.25 g per L, 4 - (p-hydroxyphenyl) - 2 - butanone

Storage & Handling

Store in the closed, original container in a cool, well ventilated area. Do not store for prolonged periods in direct sunlight. Triple rinse or preferably pressure rinse containers before disposal. Add rinsings to spray tank. Do not dispose of attractant on site. If recycling, replace cap and return clean container to recycler or designated collection point. If not recycling, break, crush or puncture and bury empty containers in a local authority landfill. If no landfill is available, bury the containers below 500mm in a disposal pit specifically marked and set up for this purpose, clear of waterways, desirable vegetation and tree roots. Empty containers and product should not be burnt. Do not contaminate streams, rivers or waterways with the chemical or used container.

Disclaimer: Any recommendations provided by Nutri-Tech Solutions Pty Ltd (NTS) or its Distributors are advice only. As no control can be exercised over storage, handling, mixing application or use, or weather, plant or soil conditions before, during or after application (all of which may affect the performance of our program), no responsibility for, or liability for any failure in performance, losses, damages, or injuries (consequential or otherwise), arising from such storage, mixing, application, or use will be accepted under any circumstances whatsoever. NTS recommend you contact an Agronomist prior to product application. The buyer assumes all responsibility for the use of any NTS products.
