

Nutri-Life Myco-Force™

Naturally occurring, bio-balancing fungal species to assist in the recovery of previously affected insect damaged plants.

Myco–ForceTM is a talc–based formulation containing the beneficial fungal species *Beauveria bassiana, Metarhizium anisopliae,* and *Verticillium lecanii*. This product also contains a growth promoting bacteria *Bacillus polymyxa*. The inclusion of these four species together in one product may prove to be extremely effective.

Benefits

- May help in reducing the use of toxic chemicals.
- Product can be used right up to harvest time.
- Based upon naturally occurring fungi & bacteria.
- · Biodegradable.
- Applicable at all developmental stages.
- A powerful probiotic.

Nutri-Life Myco-Force™

Application Rates

Foliar or Soil Application: 1 kg per ha

Prior to application, mix Myco-ForceTM with water to make a slurry. Stand for 1 hour, screen then add to fertigation or spray tank. All microbial products should be added to the tank last after all other inputs have been diluted. Apply in the late afternoon.

Storage & Handling

- Contains live organisms. Do not mix with fungicides/bactericides, toxic chemicals or soil fumigants. Sanitise spray tank before application.
- Store in cool, dry place away from sunlight and below 30°C. May be stored in a refrigerator after opening for up to 3 months, however, contamination may occur once opened. DO NOT FREEZE. Use as soon as possible after opening.
- Gloves and breathing mask should be worn at all times when handling microbial products.
- Do not use near silkworm or honey bee breeding.
- Do not exceed 60 psi.

Typical Analysis

Contains Beauveria bassiana, Metarhizium anisopliae, Verticillium lecanii and Bacillus polymyxa.

Miscellaneous

- Spray in the evening to provide humid conditions directly after application.
- Spray tanks and equipment for microbe brews must be extremely clean to prevent the proliferation of contaminants. Path-X™ is a powerful and safe biocide that is ideal for cleaning equipment. Simply dilute 100 mL with 10 L of water (1% solution) and apply, leaving the solution in contact with equipment for at least 10 minutes.
- Finally, rinse thoroughly several times with water.

Disclaimer: Any recommendations provided by Nutri-Tech Solutions Pty Ltd (NTS) or its Distributors are advice only. As no control can be exercised over storage, handling, mixing application or use, or weather, plant or soil conditions before, during or after application (all of which may affect the performance of our program), no responsibility for, or liability for any failure in performance, losses, damages, or injuries (consequential or otherwise), arising from such storage, mixing, application, or use will be accepted under any circumstances whatsoever. NTS recommend you contact an Agronomist prior to product application. The buyer assumes all responsibility for the use of any NTS products.
