

Photo-Finish™

Silica is the cell-strengthenener that can harden the cell walls, making the leaf tissue less palatable to herbivorous insects.

A multidimensional foliar fertiliser which features the cell-strengthening and brix-building benefits of silicon - the neglected nutrient. Photo-Finish™ also includes kelp, humic acid, selected trace elements and several growth promoting plant extracts. This product also supplies a significant potassium boost.

Benefits

- Biological Farmers of Australia (BFA) Registered Product 456AI.
- Promotes more efficient photosynthesis, increasing sugar and mineral levels (brix) in all plants, particularly orchard and vine crops.
- Produces an armour-like protective layer in the outer cell wall which can:
 - Prevent lodging in cereal crops.
 - Reduce the palatability of the leaf surface.
 - Aid in the recovery of pathogen-damaged plants.
 - Minimise the effects of manganese, aluminium and sodium toxicities.
 - Improve plant growth, lifting yield and quality.
 - Enhance reproduction, improve pollination and increase pollen fertility.

PACKAGING

1 L, 5 L, 20 L, 200 L
Product Code: PF

Photo-Finish™

Application Rates

Foliar: 3 - 5 L per ha (depending on plant size). Dilution: 1:200

First Aid & Safety

Poison (S5).

Caution: Keep out of reach of children.

Safety Directions: Irritant. Irritating to eyes and skin. When handling, wear impervious gloves and eye protection. Keep locked up and out of reach of children.

First Aid: For advice contact a Poisons Information Centre or your local doctor. Ph: Australia on 131 126 (free call) Ph: New Zealand on 0800 764 766 or Ph: +613 9573 3112 (worldwide) If swallowed DO NOT induce vomiting. In case of contact with eyes, rinse immediately with plenty of water and seek medical advice. In case of accident or feeling unwell, seek medical advice immediately (show the label where possible). If skin and hair contact occurs, remove contaminated clothing and flush skin and hair with copious amounts of water.

Note

As silicon is not readily transported within the plant more than one application will be required per season to ensure the full benefits.

Typical Analysis w/v

Silicon (as SiO ₂)	10.3%
Potassium.....	9.1%
Humic Acid.....	4.1%
Kelp.....	5%
Also contains plant derived growth promotants including triacontanol, saponins and cytokinins.	
pH	>11
Conductivity	67 - 73 mS/cm
Solubility.....	100%
Appearance: Brown liquid	

Miscellaneous

- This dense liquid is particularly heavy and should be handled with care to avoid back injury.
- Photo-Finish™ is very alkaline and recommended rates should never be exceeded to avoid possible plant damage.
- This product may stain foliage and/or fruit. Avoid spraying close to harvest.
- **Important: Do not spray on flowers.**
