

# Nutri-Key Tri-Shuttle™ (ZIM)

Precision fertilising is about managing specific shortages most efficiently. Cluster deficits are best addressed together.

The Shuttle™ system represents a dynamic new approach to nutrient delivery. Trace element deficits often occur in clusters. Tri-Shuttle (ZIM)™ is designed to address the most common cluster – a shortage of the trio zinc, iron and manganese.

## Benefits

- Allows the convenience of three-in-one corrections.
- Contains a productive balance of the three minerals.
- Delivers all of the standard Shuttle™ benefits, including microbial promotion.
